OPERATION MANUAL

WING GMT

Table of Contents

◆ DISPLAY and Setting Crown/Reversible Band	1
◆ Setting Local Time	2
◆ Setting Date and GMT	3
◆ Specifications	4

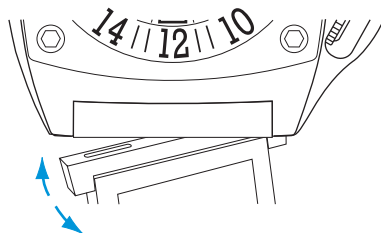

Setting Crown

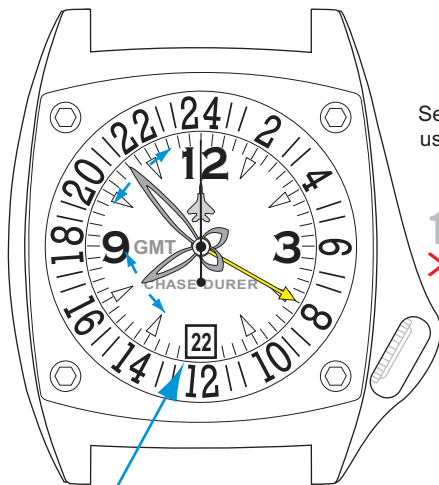

- 1** > Crown pushed in for normal time keeping.
- 2** >> Date and 24hour GMT adjustment position.
- 3** >>> Stops second hand, setting minute and hour hands position.

WARNING: Crown must be in position 1 at all times, use positions 2 and 3 for adjustments only.

Click-and-Turn Band

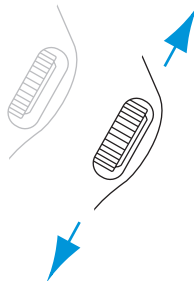

The WING GMT features a two-color (black & yellow) click-and-turn reversible leather band. Change the look instantly without tools by simply rotating the band until it clicks into position.

Date changes each time hour hand passes midnight (24:00 hours)

Setting crown in position **3** is used to adjust both hour and minute hands*

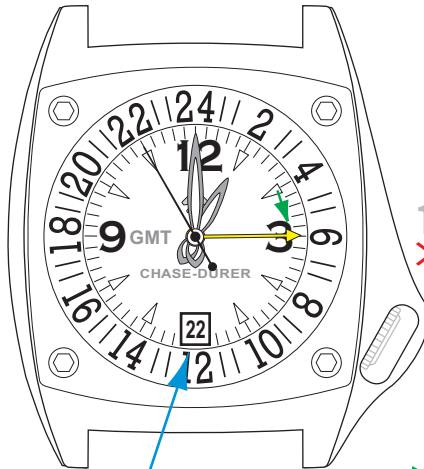

Setting crown in position **3** *Stops the Second Hand* to allow synchronizing with a time signal. There are many accurate sources for this time signal including shortwave radio frequencies that continuously announce **GMT (UTC)** and the internet.

Setting Date and GMT

3.

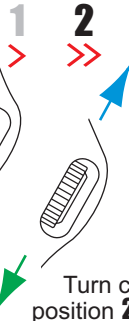

GMT (Greenwich Median Time) is an international time standard originally established to facilitate oceanic navigation and is based on the time in Greenwich, England from which the remaining 23 global time zones are derived.

GMT is 5 hours ahead of *Eastern Standard Time (EST)* and 4 hours ahead of *Eastern Daylight Time (EDT)* during Daylight Savings Time.

Date changes each time
hour hand passes midnight
(24:00 hours)

So if the time is **0900 GMT**, it is 4:00AM in New York City and 1:00AM in Los Angeles during *Eastern Standard Time (EST)*, but during *Eastern Daylight Time (EDT)* it is 5:00AM in New York City and 2:00AM in Los Angeles. **GMT** is also referred to as Coordinated Universal Time (**UTC**) or Zulu Time (**Z**).

Turn crown forward in
position **2** to set the **Date**

Turn crown backward in
position **2** to set **24hour GMT**

- Important Note -

When setting **Date** and **GMT**, the minute and hour hands must *not* be positioned between 10:30PM (20:00) and midnight (00:00). During this time the **Date** is changing and it may cause the date to be set incorrectly.

WING GMT**Technical Specifications**

- ◆ SWISS Made, RONDA 515.24H quartz dual time GMT movement.
- ◆ Case in solid 316L stainless steel case with built-in crown protector.
- ◆ Screw-locked crown and screw-in back.
